Dear Meng,

I am finalizing my plans. I am not completely sure of where I will stay, but I have set aside Saturday afternoon and evening, March 29th, to meet you.

On Sunday morning I am leaving Shanghai by train at 9:30 from Shanghai City Station.

Please reserve the afternoon and evening on March 29th – we can meet to talk about your future research and then I would like to invite you to dinner.

We can make final plans when I know where I will stay.

Best,

GR

Dear Prof. Rizzoni,

Thank you so much for your efforts! It will be my great honor to have you as my advisor. I'm looking forward to meeting you in Shanghai ;-)

All the best!

**Students,**

Please kindly fill out your course schedules using the attached form.

I filled it out with my teaching schedule to show what I have in mind.

If you are a TA, please put in things like recitation and office hours.

Many thanks

Dear Meng,

My plans for Shanghai are now complete.

I am sorry that you have to travel so far to come see me – I understand where Pudong is.

Here is my schedule, prepared by my colleague at SJTU:

**Thursday, Mar 27th**

Pick up from PVG (Please send us your flight arrival info)

Dinner at SJTU (David Hung)

Overnight stay at SJTU guest hotel (Eva to arrange)

**Friday, Mar 28th**

Breakfast at guest hotel

9:40 am David Hung to pick up from guest hotel

10:00 to 11:30 am Seminar (Prognosis of battery pack systems)

11:30 am to 1:00 pm Lunch

1:00 pm to 2:00 pm Lab Tour

2:00 pm to 3:00 pm Discussion with Prof Min Xu

3:00 pm to 5:00 pm Open

5:00 pm to 6:00 pm Break

6:00 pm Dinner (Prof Xu and others)

Overnight stay at SJTU guest hotel (Eva to arrange)

**Saturday, Mar 29th**

Check out from SJTU guest hotel

On Saturday, when I leave SJTU, I will go to a hotel near Shanghai city center:

**Ascott Huai Hai Road Shanghai**

282 Huai Hai Road Central,

Huangpu District

200021 Shanghai

+86 (0)21 23298888

My recommendation is that we meet at the Ascott Hotel in the early afternoon, for example at 2pm, so we can spend some time together.

I will bring you material to review and will explain what it will be like to be a PhD student at OSU. I am sure that we can find a comfortable place in the hotel to work in peace and quiet.

On Saturday evening I will meet with two representative from the OSU China Gateway: the Director, Phoebe (Chao) You, and her Assistant, Ruth (Zhaojia) Lu. I have invited them for dinner, and I would like you to come to dinner as well. OSU has an office in Shanghai, and they will be able to provide you with support and information in the months leading to your arrival in Columbus. Here is information on the OSU Gateway.

Re: Meng Huang Graduate Research Associate

Dear Meng:

I am pleased to offer you the position of Graduate Research Associate at the Ohio State University Center for Automotive Research for the Fall 2014 semester. This appointment provides a monthly stipend of \$1,900.00 and full-tuition and fee authorization covering all instructional and general fees, including nonresident fees, and the technology (learning) fee. In recognition of your excellent academic record and of your experience, I will augment your Graduate Research Associate stipend by the amount of 10% using discretionary funds under my control.

You may indicate acceptance of this offer by signing below and returning a signed copy of this letter to me and to Nick Breckenridge at [breckenridge.17@osu.edu](mailto:breckenridge.17@osu.edu) at your earliest convenience. Please feel free to e-mail me if you have any questions about the department, the university, or the terms of this offer.

Giorgio, Andrea,

Good news! I have been informed from the powers that be that our URP proposal "Aging modeling, state of health assessment and life prediction of electric vehicle battery packs" has been provisionally approved. In this case, "provisionally" means that Ford intends to fund the project, but cannot commit until our 2015 budget is approved. I have been told that the formal approval is planned for early 2015.

I'm looking forward on working with you on this project.

Hi Meng,

[REDACTED] upgraded you to an admin so you can install software and make changes. I just activated matlab with the newest licence. The licence is valid for any version of matlab. The machine currently has R2013a installed but if you need a later version we just need to download the update, the licence will still work for the newer version. Let me know if you need assistance with that.

I went to Bullet office yesterday and the computer looks nice thanks to your support. There is another issue with the account. I was denied with the access towards MATLAB due to lack of the license. And when I tried to install some other softwares, a warning window appears requiring the administrative authority to continue. The account shows in this warning window is "lightning" you mentioned earlier, even after [REDACTED] helped me enter the password, it still kept popping up every time I want to proceed with the install or open MATLAB. Is there any way in your opinion that we can figure this out? Please feel free to let me know if there is any action needed from my side to solve this problem so that we can start on project next week.

Thank you very much for your time and I am sincerely sorry for the extra workload caused.

Giorgio and Meng,

I think we have things figured out. [REDACTED] former desk is completed cleaned out and cleared off for you to start using anytime. It is the desk in the corner of our room by the closet. His former computer is actually a pretty powerful workstation, but was due for a software reformat. We were able to get that done and there is a completely fresh install of windows and most of the basic software we use including matlab, though you might want to confirm it is the version you want.

I am absolutely fine with making that computer available for your use, as long as our team members can still have access to it when not in use, especially evenings and weekends. I have already created a separate user account for you where you can set your own password and keep your files. The password is currently 12345, feel free to change it. There is a user account for [REDACTED] which is our student user account that our undergrads will use on our workdays.

There should not be a conflict for computer time or desk space at all for now. As we move into the summer and our busy racing season (June - August) we may have to switch out computers or revisit this, but for the next 6-7 months I don't see an issue.

See you soon.

Giorgio,

We had planned 2 desks for visiting scholars, but could squeeze 3 in for some time, as we move towards summer this could be tight but for now it would be ok. For our planning purposes could you give us a rough idea of when [REDACTED] and Meng will be with us?

Dear Prof. Rizzoni,

Please find the attached course schedule of SP 15. I double checked the ME dept. credit requirements about the MS-PhD degree (also attached with screenshot), and as it notes "As long as the primary requirements are met, any remaining courses needed to meet the required 15 hours for the MS-PhD program may be 5000-level courses." My understanding of the "primary requirements" is the 9 credits for the ME 6000+ courses, therefore I think the ME5339 I have taken this semester should also count for the remaining part of 6 credits : )

I did a brief summary based on the requirement and the part I have completed, and designed for the coming semesters. As both of these two courses (ECE6750 Linear System Theory and ME6507 Intermediate Numerical Methods) count for the Math requirement, there could be different designs based on the classifications for the future potential courses. Besides your diagnostics class in the coming fall, there will be only one course needed by the end of the Sp15 to meet the min requirement of the degree.

Meng,  
Thanks again for the very thoughtful and kind gift! I enjoyed some of the excellent fruit at the end of dinner. Italians, like the Chinese, end their meals with fruit...  
I am glad that you made progress, and that you are on the right track. Let's think carefully about the webex on Wednesday. Please send me a proposed outline tomorrow, and try to send me a draft presentation by Tuesday night. Everything you and I have discussed the last couple of times is perfectly good for Ford. Certainly the three-column description. Also, be prepared to show some samples of data from the cycling that would correspond to the "far away", "charge" and "transient" conditions we have discussed.

July 29<sup>th</sup>, 2014

Dear Ms. Huang

It was a pleasure to meet you in person in Shanghai last March, and I am very pleased that you have accepted the offer extended to you last April. At that time, I committed to supporting you as a Graduate Research Associate for the duration of your PhD studies. With this letter, I am pleased to inform you that you have been selected to be funded as a United States Department of Energy (US-DOE) Graduate Automotive Technology Education (GATE) Graduate Fellow for the first two years of your studies (with the same stipend and benefits outlined in your original offer letter). This is a prestigious appointment – the US-DOE has recognized seven universities in the USA as GATE Centers of Excellence, Ohio State being one. Once your Fellow appointment ends, the remainder of your studies will be funded by research programs funded either by government agencies, such as the US-DOE or the National Science Foundation, or by one of our many industry partners. I expect that the duration of your PhD studies will be three to four years. In summary, I am making a firm commitment to supporting you for the duration of your studies. Further, in addition to guaranteeing funding for the duration of your studies, I will add a supplement to your monthly stipend in the amount of 10%.

During the first year, and thanks to the Fellowship, you will have the opportunity to take courses and to prepare for the Ph.D. Qualifying Exam. You will not have any specific research assignments, but you will participate in the meeting of my electrochemical energy storage systems research group to become familiar with our research. The topic in which I will engage you is:

*Modeling, characterization and management of battery state of health and life, using electrochemical, thermodynamic and dynamic system modeling approaches to model mechanisms of aging in electrochemical batteries. As part of this work, you will have access to the facilities of our electrochemical energy storage laboratory and of its staff, who will support you in conducting battery characterization and aging experiments in support of your research. Attached to this letter you will find a brief presentation that describes the activities of our research center in this area.*

You will work within a group, have regular meetings with the group and with me, as well as individual meetings with me. Alex Bartlett, a senior PhD student conducting research in related areas, will be your student mentor upon your arrival. In time, I expect you to become a leader in your research field, and to take on the responsibility to serve as a mentor to younger students.

Here is the Monday morning update.

The knee is up and down. Tends to swell up later in the day, and while I can manage the pain on Tylenol, it's not exactly dreamland...

But I can move around easily, without crutches. I use them for the stairs.

Maryn:

My PT appt is at 12:15. My plan is to see [REDACTED] at my house at 11 to go over her dissertation and at noon she would drive me to the Jameson Crane on Ackermann. Where I should be done at 1:30. Here is an idea. When I know I am done with PT I could call you and if you don't mind coming to get me (5 minutes from CAR), then we can talk. Depending on how I feel, I could come to CAR for a bit, or you could drive me home (where I have all the pillows in the strategic places) and we can talk there.

I just sent [REDACTED] a text, and am waiting for a reply, but I did suggest this option to her yesterday and I am sure she will be glad to drive me.

Jan and Maryn:

While the recovery is going well, I can see that it will be mighty hard for me to move for some time. I ordered a jet pack, but it won't be delivered for some time...

I am trying to schedule the first PT appt., but that is proving to be difficult. Should hear something today. Those appts will be at Jameson Crane on Ackerman.

Here are my thoughts: I will not go anywhere Monday or Tuesday. Wednesday I am coming in for the Teradata mtg., and I will have to go to the dentist later that day. We will learn a lot on Wednesday about what it's like for me to try to function. And Thursday and Friday I will have to be in for the Cummins mtgs and go to Bilin's seminar.

I am thinking that I may need a wheelchair to move around the office. I wonder what we could do to borrow-rent one. the reason for the wheelchair is that I cannot imagine sitting in a regular chair – walking is not so bad, but sitting without the leg propped up seems difficult right now.

Any thoughts you might have are welcome.

Your pain-free-while-medicated friend...

 Overnight stay at SJTU guest hotel (Eva to arrange)

**Saturday, Mar 29th**

Check out from SJTU guest hotel

On Saturday, when I leave SJTU, I will go to a hotel near Shanghai city center.

My recommendation is that we meet at the Accor Hotel in the early afternoon, for example at 2pm, so we can spend some time together.

I will bring your material to review and will explain what it will be like to be a PhD student at CSU. I am sure that we can find a comfortable place in the hotel to work in peace and quiet.

On Saturday evening I will meet with two representatives from the CSU China Gateway, the Director, Phoebe Li (Faei) You, and her Assistant, Ruth (Zhu) Jia Li. I have invited them for dinner, and I would like you to come to dinner as well. CSU has an office in Shanghai, and they will be able to provide you with support and information in the months leading to your arrival in Columbus. Here is information on the CSU Gateway.

On Sunday morning I will travel to Hefei (I will explain the details) when we see each other, and on Wednesday, April 2, I will return from Hefei to Shanghai City Station by train, and will then take a taxi to Pudong PVG airport to return to Columbus.

Thank you for taking the time to come meet me, as well as the CSU Gateway staff. I look forward to meeting you in person!

Dear Meng:

It was truly a pleasure to new meet you in person. Thank you for the wonderful conversation yesterday evening. You are a very impressive young lady and I know you will do well at OSU.

Please allow me to introduce you to Tung Li who has been studying with me for a couple of years now. Li like you, I a very special person, and is ready to help you with any questions related to Columbus. I hope you can become friends at a distance, before you meet in person.

Meng,

I do not know if you have seen the PACE lab – we have excellent computational facilities at CAR

I do not think that you need any babysitting – the reason I gave you a desk in the room where Jivu and Li are is because it is the only space I thought of that was close to my office. I had not thought about the Bullet office. Good idea. I will set that up for you today.

I like your thought process.

You can plan to come this afternoon and set up office there.

Thanks

Dear Meng:

Good timing. I was beginning to wonder what had happened to you.

No worries. Please complete the admissions procedures as soon as possible and make plans to arrive well in advance of the start of classes.

Have you planned a date? My recommendation is that you arrive no later than August 1, so you have time to adjust.

Li Tang will help, if needed.

Best,

Dear Prof. Rizzoni,

How is your day today? I am so sorry that I didn't reply earlier... I have been on a training session in our plant outside Shanghai the day after we met. In fact, I should have left on that Friday, yet I postponed it so that we could have that meeting which was such a pleasant and enjoyable experience! Thank you so much for your generous offer, it is my great honor to be granted this chance to work with you.

USB of Laptops in the plant are blocked for outside mails. Given the confidentiality of this offer letter, I prefer to have it printed and scanned after I come home back at Shanghai in a couple of days. I will also take care of the OSU online application system to make sure that every requirement is met. Thanks a lot for your understanding.

Please feel free to contact me for any concern you have and looking forward to your short reply : )

Best regards!

Meng Huang

Dear Meng Huang:

We are pleased to inform you the Graduate Studies Committee recommended you for admission to the MECHENG-PH program at The Ohio State University Graduate School for Autumn 2014. However, before Ohio State can finalize your admission, we must have clear evidence sufficient funding will be available to support you while you live and study in the United States.

Generally, the following documents are required along with a photocopy of your passport - include copies for dependents (spouse and/or children who will accompany you to Ohio State):

- Completed & signed Affidavit of Financial Support form (Complete and submit the attached Affidavit)
- A bank statement with a balance sufficient to cover the estimated expenses for you and your dependents (Find your program's Estimated Expenses on the attached list)

Visit the Application Status section of your Applicant Center at <http://appstatus.osu.edu> to know exactly what you need to submit or revise, and when it is due. The items will be reviewed by us after the status shows "Completed" in the list of required items. After the required items have been reviewed and if found sufficient we will issue your visa authorization. If you receive this email again, your recently submitted documents were not sufficient. See your Applicant Center for details. Failure to submit the required items by the due date may result in cancelation of your application by your program.

For more information about financial documents go to the Financial Documents section of our FAQs at <http://admissions.osu.edu/grad/faqs/>.

Always include your OSU ID and your full name when sending documents or communicating with The Ohio State University.

To expedite processing, please either:

Fax your documents to 614-247-1886 OR

Scan and attach your documents to an email and send to [gradadmissions@osu.edu](mailto:gradadmissions@osu.edu).

If you must send your documents via postal mail, send to:

Thx! David just replied to my text about the 2016 Ford Focus SE. Unfortunately he won't be at CAR this coming week but he did texted me the info of dealer in Michigan where his son bought his Ford Fusion. I will call the dealer tomorrow for a quote as they close on Sundays. Just a thought: besides David, who else in your mind may help with a good offer for a Ford Focus? I was just hoping to get this topic done soon.  
Thx!

Prof. Rizzoni, I have emailed you the preliminary results on voltage comparison and your feedback at your convenience is appreciated. I have to take a short break back home for a medical examination and should be back soon. Many thanks!

Morning, professor! It's Labor Day weekend so I am out of town. Wish you a happy holiday weekend and see you the coming week!

9/2/17 12:17:11 PM EDT

Meng, I wonder when we will prepare for the next teleconference. I have no time on Tuesday or Wednesday. Enjoy being on holiday...

9/9/17 2:09:23 PM EDT

Shall we meet at 1 tomorrow?

If you are at car now, please come see me to look for dates. Thanks. G

9/14/17 1:18:42 PM EDT

Don't worry about my previous message. We can deal with dates on Sunday. If you can, I would like to meet at 12 45 on Sunday, instead of 1. Thanks. G

9/19/17 6:20:46 PM EDT

Please kindly reply to my email. Thanks. G

Hi Malavika,

Hope all has been well with you : ) It's nice to talk to you today (on phone though). I have been told you are a very intelligent student and I am glad you are considering OSU/CAR as one of potential choices for your graduate study. I have similar experiences making this kind of decision, therefore I might be able to share a bit of your thoughts right now.

How about we meet at Scott for a brief talk if time works for you? I will be at Scott both tonight and most of tomorrow. No matter what your final decision is, I will be glad to get to know you and hopefully we can become good friends. Just send me an email or call me (614-286 6025) so that we can arrange this ^\_^

Cheers!

Meng Huang
